PROFILE

5th year Data Science engineering student specializing in computer vision and deep learning, with hands-on experience in autoencoders and predictive modeling.

SKILLS

AI/ML: Python, TensorFlow, Keras, Scikit-learn, XGBoost, NLP, LLMs, Deep Learning, Computer Vision, MLOps
Data: Pandas, NumPy, Matplotlib, Seaborn, R, Power BI, Statistics
Development: React Native, TypeScript, Java, Python, Spring Boot, FastAPI, .NET/C#, REST APIs
Cloud & Backend: Firebase/Firestore, Docker, Git, Linux
Databases: MySQL, MongoDB, Neo4j, Hive
Networking & Security: TCP/IP, LDAP, Nmap, Nessus

EXPERIENCE

Mobile App Developer Intern – Tanit Consulting AB Jul 2026 – Aug 2026
FrostLink – React Native, Expo, TypeScript, Firebase, Hugging Face

- Integrated Hugging Face XLM-RoBERTa for NLP-based content moderation across chats
- Contributed to the Firebase/Firestore backend and reinforced parts of the database security

AI Intern – Ooredoo (DTI) Jul 2025 – Sep 2025
Lac 2

- Benchmarked conversational AI solutions for customer service
- Conducted data collection workshops and dataset preparation

AI Researcher Feb 2024 – Jun 2024
Faculty of Sciences of Tunis

- Research in deep learning with focus on denoising autoencoders for image reconstruction with missing pixels
- Analyzed results, improved reconstruction performance, and wrote a 70-page research report

PROJECTS

QoS Buddy – Network QoS Monitoring

- Anomaly detection on cellular network KPIs using LSTM and Denoising Autoencoders
- Integrated Mistral LLM for NL report generation; built React dashboard for real-time QoS visualization

Concrete Strength Optimization – Material Engineering

- XGBoost regression for compressive strength prediction from mix parameters
- RL (Contextual Bandit) for mix optimization + offline Q-learning for cost-performance tradeoff

Diacure – Diabetes Management App

- NLP-based recommendation engine matching articles to user health profile
- Cross-platform mobile app (FlutterFlow) with integrated AI chat assistant

EDUCATION

Engineering Degree in Computer Science 2024 – Present
Private Higher School of Engineering and Technology (ESPRIT)

Bachelor in Software Engineering 2021 – 2024
Faculty of Sciences of Tunis

CERTIFICATIONS

- Fundamentals of Deep Learning — NVIDIA
- Applications of AI for Predictive Maintenance — NVIDIA
- Building Transformer-Based NLP Applications — NVIDIA
- AI for Anomaly Detection — NVIDIA
